PROJECTS

Startup Initiative – Co-Founder & Organizer (In Progress)	2025 – Present
- Leading a team of four to conceptualize, plan, and launch a startup focused on developing a SaaS platform. - Defining the product vision and roadmap. - Coordinating team roles and responsibilities. - Researching market trends and identifying customer needs. - Developing initial prototypes using VueJS, Python, PostgreSQL and Deepseek R1. - Gaining hands-on experience in business strategy, team leadership, and product development.	
Car Rental E-Commerce Platform – Team Project	2023 – 2024
Developed a full-stack platform using Vue.js, C# .NET, and SQL in an Agile Scrum environment.	
Automated Trading Algorithms – Personal Project	2020 – 2022
- Partnered with two developers to create a trading algorithm using smooth mathematical transformations. - Achieved 3x returns compared to buy-and-hold strategies with consistently low drawdown.	
TradingView & Discord Community – Personal Project	2018 – 2020
- Developed automated trading algorithms using PineScript on TradingView. - Built and managed a Discord community of 160+ active followers and testers.	
Graphic Design & Creative Works – Personal Projects	
Acquired extensive knowledge in Adobe Photoshop, Illustrator, and InDesign.	

INTERNSHIPS

Rezolv – Software Developer (in progress)	2024 – 2025
- Developed the Graydon Creditsafe - Odoo CRM integration module using Python and PostgreSQL. - Working within an Agile/Scrum environment to deliver scalable solutions.	
PXL FabLab – Prototyping & Lab Management	2019 – 2020
- Prototyped a lab management platform and assisted with day-to-day operations. - Supported product designers with 3D printing, CNC, and Prototyping.	

EDUCATION

PXL - Graduate Software Development (in progress)	2023 – 2025
- Focused on C#, .NET MAUI, and software development fundamentals. - Transitioned to self-directed learning in React and Flutter to align with industry trends.	
BeCode - Web Development	2018 – 2019
- Mastered HTML, CSS, and JavaScript fundamentals. - Applied skills to build a custom xml client-side rendering framework.	
Additional Learning	
- Completed coursework in Digital arts, Product Design, and Philosophy through Howest, PXL, KUL and Syntra. - Developed a strong foundation in problem-solving, design thinking, and technical skills.	

TECHNICAL SKILLS

Programming languages	Python • TypeScript • JavaScript • Rust • C# • Dart • PineScript • Basic
Frameworks and libraries	VueJS • React • NodeJS • HTML6 • CSS3 • Sass • Flutter • MAUI • WPF
Databases	PostgreSQL • MySQL • SQLite • Microsoft SQL Server
Tools & Platforms	GIT • GitHub • Docker • Azure • VS Code • Postman • Deepseek • OpenAI
Design Tools	Figma • Adobe Photoshop • Illustrator • InDesign • Lightroom • SD

MOTIVATION

I am an aspiring **Full Stack Developer** with a diverse background spanning **web development**, **AI-driven automation**, and **algorithmic trading**. My passion for programming ignited in **2018** through developing automated trading algorithms, rapidly leading me to build and manage an engaged **Discord community of over 160** like-minded developers, further fuelling my drive to **innovate**.

Freelancing provided opportunities to deepen my skills by crafting custom **trading tools and algorithms** tailored for various clients. Driven by a desire to foster greater collaboration among developers, I pursued formal web development training through an intensive **bootcamp**, aiming to create an online platform for professionals passionate about algorithmic development.

During the **COVID-19 pandemic**, I collaborated closely with two programmers to develop a **BTCUSD trading algorithm** applying advanced mathematical transformations and growth models. Facing significant computational constraints forced us to rethink, optimize, and innovate, yielding invaluable experience in **algorithm efficiency** and **system optimization** under pressure.

Recognizing my need for stronger foundations in **software architecture**, **artificial intelligence**, and **reinforcement learning**, I enrolled in the Graduate Programming course at **PXL**. Currently, as an intern at **Rezolv (Corda Campus Hasselt)**, I have successfully developed the **Graydon-Creditsafe integration for Odoo**, and I'm actively automating key tasks for the **sales team**—from transforming **B2B data** into highly targeted **lead lists**, to streamlining **email marketing campaigns**. My initial cautiousness around AI has evolved into a proactive mission to harness its full potential, continuously refining workflows to drive **efficiency and innovation**.

WHY HIRE ME?

Fast-rising Full-Stack Developer

- 1-year Bootcamp + 2-year Graduate Programming degree + 7 months in a high-velocity internship at Rezolv, delivering production-ready integrations (e.g. Graydon-Creditsafe for Odoo).

Technical & Architectural Vision

- Proficient in JavaScript, Python, AI-powered automation and algorithmic trading frameworks; strong eye for both UI/UX design and scalable software architecture.

Neurodiverse Strengths

- Autistic traits exceptional attention to detail, pattern recognition and unwavering consistency ensure clean, maintainable code and rock-solid testing.

Process-Obsessed & Minimalist

- OCD-driven tidiness and love of minimalism push me to continually refine workflows, reduce complexity and enforce best practices across the team.

Clear, Direct Communicator

- Honest, literal, “no-fluff” style keeps stakeholders aligned, feedback loops tight and project timelines on track, ensuring clarity and confidence at every stage.

Relentless Problem-Solver

- I won't say “I can't” until I've rigorously tried, tested and explored every alternative, then I'll propose an improved solution.

AI & Automation Evangelist

- Passionate about harnessing AI to streamline operations, from targeted B2B lead enrichment to end-to-end email-marketing automation.

Collaborative Community Builder

- Founded and grew a 150-member developer Discord—skilled at fostering engagement, mentorship and cross-disciplinary teamwork.
